

Basic Use Cases

(1)

Use case	Mass import user records
Actor	User
Trigger	Navigate to the Mass Import User Records tab
Precondition	/
Basic Flow	<ul style="list-style-type: none">• Obtain a string containing the multiple entries of user names and emails• Parse the string and process the content• If data is corrupted, ask user to re-enter• Store information (including optional comments to all users) in database

Execution Plan

- 1) Create a new form comprising a text area, a ... and a submit button
- 2) Analyse existing code to understand components that need to be changed
- 3) Write the code

Problem

Stuck at how to create additional menu tabs.
